

HBvaxPRO™ supply statement

A combination of growing global demand for hepatitis B vaccines and supply capacity constraints due to growing global demand of other MSD vaccines have led to interruptions in the supply of HBvaxPRO 10mcg in the UK.

- HBvaxPRO 10mcgs is currently out of stock in the UK. We expect that the supplies of HBvaxPRO 10mcgs will resume during the second half of 2020.
- Sufficient supplies of HBvaxPRO 5mcgs are currently available.
- Limited supplies of HBvaxPRO 40mcgs remain available via AAH, the MSD nominated wholesaler.

MSD has been working with the Department of Health and Social Care (DHSC) and Public Health England (PHE) to manage the remaining supplies of HBvaxPRO. Information about alternative supplies of the hepatitis B vaccine and guidance about supply management are available from PHE on the webpage entitled 'Hepatitis B: vaccine recommendations during supply constraints', available at <https://www.gov.uk/government/publications/hepatitis-b-vaccine-recommendations-during-supply-constraints>.

MSD apologises for the interruption in the supply of HBvaxPRO 10mcgs and would like to assure customers that plans are being put in place for the reintroduction of supplies in 2020.
