

## **MMR VaxPRO® Vaccine supply statement**

A combination of growing global demand as a result of recent measles outbreaks, alongside manufacturing constraints, have led to interruptions in the supply of MMR VaxPRO for the private market in the UK.

(Note: the supplies of MMR VaxPRO to fulfill the National Immunisation Programme are unaffected)

Continuity of supply of our medicines and vaccines has been and remains one of our highest priorities and we are working to resolve this situation as soon as possible.

MSD has already made investments and taken steps to increase manufacturing capacity to meet growing demand, but it takes time for this new capacity to take full effect. Supplies of MMR VaxPRO outside of the National Immunisation Programme (private market) are expected to be limited until further notice and customers should discuss potential alternative with healthcare providers, when appropriate.
